

DISCLOSURE OF INFORMATION

PT ESSA Industries Indonesia Tbk. (hereinafter referred to as the "Company") hereby informs that the Banggai Ammonia Plant (BAP) operated by PT Panca Amara Utama (a subsidiary of the Company) will undergo a Pre-scheduled plant closure, scheduled to take place for \pm 1 week started from **27 May 2024**.

The Pre-scheduled plant closure is conducted as part of the Company's scheduled maintenance activities to maintain optimal operational facility standards, even though this activity will have an impact in the decrease of ammonia production. Such activity is in line with Company's commitment of operational excellence.

BAP is recognized as the most efficient Ammonia Plant globally, leveraging the KBR Reforming Exchanger System & Purifier Technology. This activity is essential for BAP to uphold performance reliability and operational excellence.
