

INFORMATION DISCLOSURE

PT ESSA Industries Indonesia Tbk (hereinafter referred to as the "Company") hereby informs that the Banggai Ammonia Plant ("BAP"), operated by PT Panca Amara Utama (a subsidiary of the Company), will undergo a planned temporary shutdown or pre-scheduled plant closure for a period of \pm 5 weeks, commencing on **6 May 2026**.

The pre-scheduled plant closure is necessary as part of routine maintenance activities to ensure the optimal condition of the Company's operational facilities. Although this activity will impact ammonia production levels, it is carried out in line with the Company's commitment to operational excellence.

BAP is one of the most efficient ammonia production facilities in the world, utilizing KBR Reforming Exchanger System & Purifier Technology. This scheduled maintenance is an important activity to maintain and enhance the plant's performance and operational reliability in the future.
